Independent Auditors' Report on Review of Condensed Interim Financial Information

To the Shareholder and Board of Directors of Agrarian Credit Corporation Joint Stock Company

Introduction

We have reviewed the accompanying condensed interim statement of financial position of Agrarian Credit Corporation Joint Stock Company (the "Company") as at 30 June 2022, and the related condensed interim statements of profit or loss, comprehensive income, changes in equity and cash flows for the six months then ended, and notes to the condensed interim financial information (the "condensed interim financial information"). Management of the Company is responsible for the preparation and presentation of this condensed interim financial information in accordance with International Financial Reporting Standard IAS 34 *Interim Financial Reporting*. Our responsibility is to express a conclusion on this condensed interim financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity.* A review of condensed interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Opinion

As at 30 June 2022 and 31 December 2021, in the condensed interim statement of financial position for loans issued to corporate customers, classified in Stage 3, with the gross carrying amount of KZT 336,882,696 thousand and KZT 304,221,793 thousand, respectively, the Company recognised an allowance for expected credit losses in the amount of KZT 68,173,150 thousand and KZT 62,564,653 thousand, respectively. International Financial Reporting Standard (IFRS) 9 *Financial Instruments* requires the entity to use reasonable and supportable information on which assumptions and expectations are based when measuring expected credit losses. We disagree with certain assumptions used to estimate the expected cash flows from the collateral realisation for credit-impaired loans to corporate customers and believe that the allowance for expected credit losses is significantly understated. The qualitative effects of this departure from International Financial Reporting Standards on the condensed interim financial Information have not been determined.

Qualified Conclusion

Based on our review, except for the effect of the matter described in the Basis for Qualified Conclusion paragraph, nothing has come to our attention that causes us to believe that the condensed interim financial information as at 30 June 2022 and for the six months then ended is not prepared, in all material respects, in accordance with IAS 34 Interim Financial Reporting.

1. Reporting entity

Agrarian Credit Corporation Joint Stock Company (hereinafter. the "Company") was established by the Decree of the Government of the Republic of Kazakhstan No. 137 dated 25 January 2001 "On the Issues of the Agricultural Sector Lending" as a joint stock company in accordance with the legislation of the Republic of Kazakhstan. The Company is operating on the basis of a license to carry out operations provided for by the banking legislation of the Republic of Kazakhstan, No. 5.2.24 dated 5 November 2013, issued by the Committee for Regulation and Supervision of the Financial Market and Financial Institutions under the National Bank of the Republic of Kazakhstan ("NBRK"). The activities of the Company are regulated by the Agency for Regulation and Development of the Financial Market of the Republic of Kazakhstan.

The Company's principal activity is implementation of the government programmes to support the agricultural (agrarian) sector; attraction of the domestic and foreign investments to implement its own projects in the agro-industrial complex; development and implementation of projects in the agro-industrial complex; sale of the pledge property and agricultural products received as repayment of the funds granted and to perform bank borrowing operations on the basis of the relevant license; performance of the leasing activities, and other activities not prohibited by the legislative acts that meet the goals and objectives of the Company provided for by its Charter.

The Company's financing activities stipulate specific requirements and restrictions on the use of funds. The interest rate on loans provided is lower than the market rate due to implementation of the agricultural development programmes in the Republic of Kazakhstan.

As at 30 June 2022 and 31 December 2021, the Company had 17 registered branches in the Republic of Kazakhstan.

Prior to 18 March 2021, Baiterek National Managing Holding Joint Stock Company owned 100% of the Company's shares. In accordance with section 52 of the National Action Plan for Implementation of the Address of the President of Kazakhstan dated 1 September 2020 "Kazakhstan in a New Reality: Time for Action," approved by the Decree No.413 of the President of the Republic of Kazakhstan dated 14 September 2020, a single development institution has been established through the merger of Baiterek National Managing Holding Joint Stock Company and KazAgro National Managing Holding Joint Stock Company.

On 18 March 2021, 100% of the Company's shares were transferred to Baiterek National Managing Holding Joint Stock Company.

As at 30 June 2022, Baiterek National Managing Holding JSC owns100% of the Company's shares.

The Company's ultimate owner is the Government of the Republic of Kazakhstan.

The Company's registered office is: 11 Imanov Street, Nur-Sultan, Republic of Kazakhstan.

Kazakhstan business environment

The Company's operations are primarily located in the Republic of Kazakhstan (the "RK"). Consequently, the Company is exposed to the economic and financial markets risks of Kazakhstan, which display emerging-market characteristics. The legal, tax and regulatory frameworks continue development, but are subject to varying interpretations and frequent changes which together with other legal and fiscal impediments contribute to the challenges faced by entities operating in Kazakhstan. Depreciation of the Kazakhstan Tenge, volatility in the global price of oil and the COVID-19 pandemic have also increased the level of uncertainty in the business environment.

In February 2022, because of the military conflict between the Russian Federation and Ukraine, a number of countries imposed sanctions against the Russian Federation. The conflict affects not only the economic activity of two countries but the global economy as well. As a result of sanctions, commodity and food prices have risen in many countries around the world, the established links between supply of resources have been disrupted, inflation also affects the prices, and analysts also forecast economic implications for the global industry.

Against the background of the aforementioned geopolitical events, the national currency of the Republic of Kazakhstan has weakened against world currencies.

In July 2022, the National Bank of Kazakhstan increased the base rate to 14.5% with a corridor of +/-1%. According to press releases from the National Bank of Kazakhstan, the rapidly changing geopolitical and external economic environment in trading partner countries and the unprecedented level of uncertainty reduce significantly the possibility to make robust forecasts regarding the impact of the conflict on the economy of the Republic of Kazakhstan.

Management is in the process of quantitative assessment of further impact of said events on the Company's operations.

The condensed interim financial statements reflect management's assessment of the impact of the Kazakhstan business environment on the operations and the financial position of the Company. The future business environment may differ from management's assessment.

2. Basis of preparation

Statement of compliance

These condensed interim financial statements for the six months ended 30 June 202w have been prepared in accordance with LAS 34 *Interim Financial Reporting*. Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the last annual financial statements as at 31 December 2021 and for the year then ended.

These condensed interim financial statements do not include all the information required for full annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRSs").

Basis of measurement

The condensed interim financial statements have been prepared on the historical cost basis.

Functional and presentation currency

The functional currency of the Company is the Kazakhstan tenge ("KZT") as, being the national currency of the Republic of Kazakhstan, it reflects the economic substance of the majority of underlying events and circumstances relevant to them. The KZT is also the presentation currency for the purposes of these condensed interim financial statements.

All financial information presented in KZT has been rounded to the nearest thousand.

Use of estimates and judgments

Preparing the condensed interim financial statements requires management to make judgements, estimates assumptions that affect the application of accounted policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods, in which changes in estimates affect data in the condensed interim financial statements.

The significant judgements described in Notes 5, 6, 7, 8, 9, 10 and 17 made by management in applying the Company's accounting policies are the key sources of estimation uncertainty were the same as those that applied to the last annual financial statements.

3. Significant accounting policies

The accounting policies applied in these condensed interim financial statements are the same as those applied in the last annual financial statements.

The accounting policies applied in these condensed interim financial statements are the same as those the Company applied for preparation of the last annual financial statements.

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2022; they do not have a material effect on the Company's condensed interim financial statements:

- Interest Rate Benchmark Reform Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16)

16. Commitments and contingencies

Taxation

Kazakhstani commercial, and in particular, tax legislation contains regulations, interpretation of which could vary, and in certain cases, the legislation could be amended with indirect retrospective impact. Also, the Company's management's interpretation of the legislation may differ from that of tax authorities, and as a result, transactions carried out by the Company could be estimated by tax authorities in another way, and this could result in an additional charge of taxes, fines and penalties. The company's management considers that all necessary tax accruals were fulfilled and, correspondingly, there were no allowances charged in the statements. Tax periods remain open for 5 (five) years. Management believes that its interpretation of the legislation as at 30 June 2022 and 31 December 2021 is appropriate and the Company's positions in terms of taxes, currency legislation and customs duties will be confirmed.

Legal matters

In the normal course of business, the Company is the subject of legal actions and claims, Management believes that the potential liabilities, if any, resulting from such actions and claims will not have a material adverse effect on the Company's future financial position or performance.

Management is unaware of any significant or pending and threatened claims against the Company.

The following describes the methodologies and assumptions used to determine fair values for those financial instruments, which are not recorded at fair value in these condensed interim financial statements.

Assets whose fair value approximates their present value

For financial assets and financial liabilities that are liquid or have a short maturity (less than three months), it is assumed that their present value approximates fair value. This assumption also applies to the call deposits and savings accounts with no fixed maturity date.

Fixed and variable rate financial instruments

For listed debt instruments, the fair value is based on quoted market prices. In case of non-quoted debt instruments, a discounted cash flow model is used using the current interest rate, taking into account the remaining period to maturity for debt instruments with similar terms and credit risk.

For loans to customers future cash flows are discounted using an average market rate of financial instruments with similar maturities, based on statistics published by NBRK. This approach has been used to measure the fair value of loans to customers. For loans to banks future cash flows are discounted using a market rate calculated using a build-up model based on all observable inputs such as KASE yield curve and credit spread for the borrower rating adjusted for maturity that is calculated using an average market rate of financial instruments with similar maturities and credit rating. As at 30 June 2022, an average market rate was 14.91% - 16.47% p.a. (unaudited) (31 December 2021: 10.54-16.70% p.a.).

For liabilities whose fair value is disclosed in the financial statements, future cash flows are discounted at the market rate calculated using a build-up model based on all observable inputs such as KASE yield curve and credit spread for the Company rating adjusted for maturity that is calculated using an average market rate of financial instruments with similar maturities and credit rating. As at 30 June 2022, the market rate used to measure the fair value of loans raised, investment securities was 14.70%-15.70% p.a. (unaudited) (31 December 2021: 10.42-12.47% p.a.). Future cash flows include repayment of a principal debt and interest calculated at the contractual interest rate applied to the principal debt.

18. Risk management

Management of risk is an essential element of the Company's operations. The major risks faced by the Company are those related to market risk, credit risk and liquidity risk. As at 30 June 2022, there have been no significant changes in the liquidity risk since 31 December 2021. As at 30 June 2022 the Company has no exposure (unaudited) to currency risk (31 December 2021 no exposure).

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. Market risk comprises currency risk, interest rate risk, yield curve risk and other price risks. Market risk arises from open positions in interest rate and equity financial instruments, which are exposed to general and specific market movements and changes in the level of volatility of market prices and foreign currency rates.

for the six months ended 30 June 2022

The objective of market risk management is to manage and control market risk exposures within acceptable parameters, whilst optimising the return on risk. Overall authority for market risk is vested in the Risk Management Department. The Company manages its market risk by setting open position limits in relation to financial instruments, interest rate maturity and currency positions and stop-loss limits. These are monitored on a regular basis.

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. Interest rates on assets and liabilities of the Company are fixed. During the reporting period there were no significant changes in the Company's exposure to interest rate risk.

19. Segment reporting

The Company's operations are highly integrated and constitute a single business segment for the purposes of IFRS 8 Segment Reporting. The Company's assets are concentrated in the Republic of Kazakhstan, and revenues are derived from operations in, and connected with, the Republic of Kazakhstan. The Chief Operating Decision Maker, in the case of the Company, the Chairman, only receives and reviews the information on the Company as a whole.

20. Related party transactions

In accordance with LAS 24 Related Party Disclosures, parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

Related parties may enter into transactions which unrelated parties might not. Prices and terms of such transactions may differ from prices and terms of transactions between unrelated parties.

The Government of the Republic of Kazakhstan controls the Company's operations through the Shareholder.

Balance of related party transactions as at the end of the reporting period and respective amounts of income and expenses are provided below:
